

## Project: Case Study

1)

**Output:**

**Conclusion:**

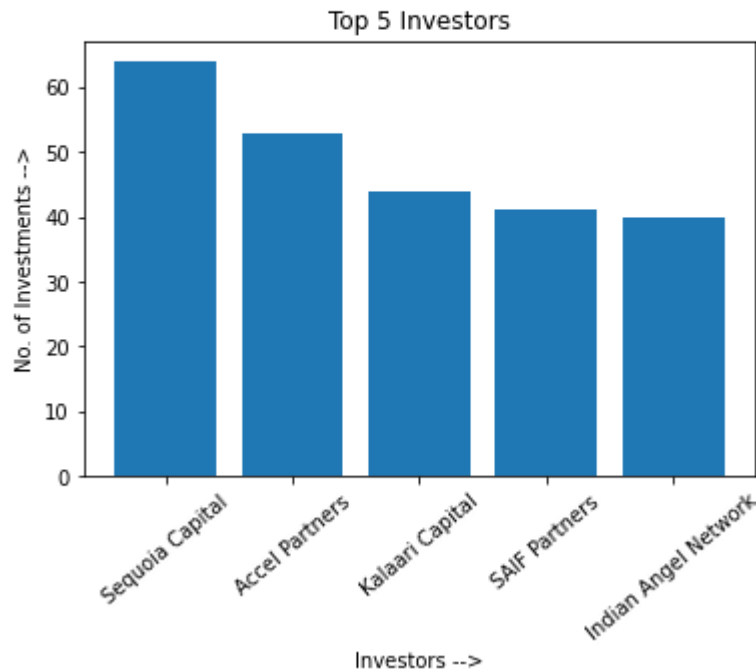

From the above graph it could be concluded that the maximum number of findings were raised from NCR which is 709.

I would suggest my friend to select NCR as the first location to open his start-up followed by Bangalore and Mumbai.

2)

**Output:**

Sequoia Capital 64  
Accel Partners 53  
Kalaari Capital 44  
SAIF Partners 41  
Indian Angel Network 40

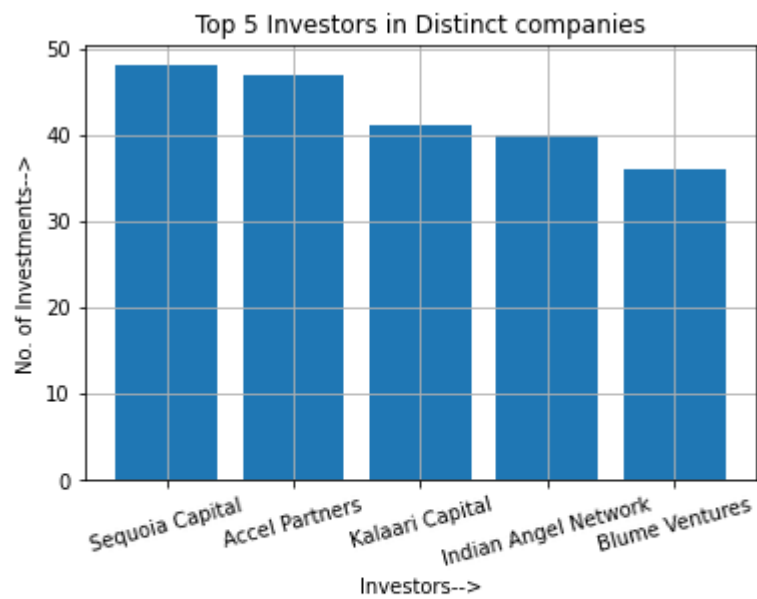

### Conclusion:

I would suggest my friend to contact these investors for his start-up's investment in the order shown in the bar graph above.

3)

Output:

Sequoia Capital 48  
Accel Partners 47  
Kalaari Capital 41  
Indian Angel Network 40  
Blume Ventures 36

---

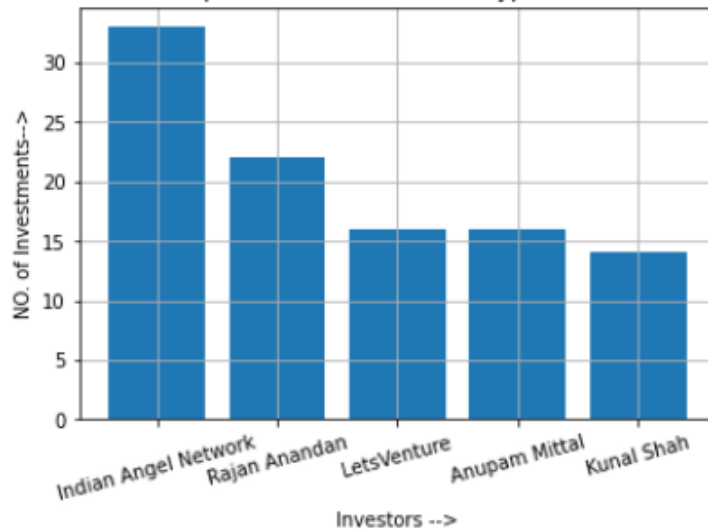

### Conclusion:

I would suggest my friend to contact these 5 investors in the order shown in the bar graph above because they have invested more in unique start-ups than others.

4)

OUTPUT:

Top 5 Investors in Distinct companies with Investment Type as Crowd Funding or Seed Funding

Indian Angel Network 33  
Rajan Anandan 22  
LetsVenture 16  
Anupam Mittal 16  
Kunal Shah 14

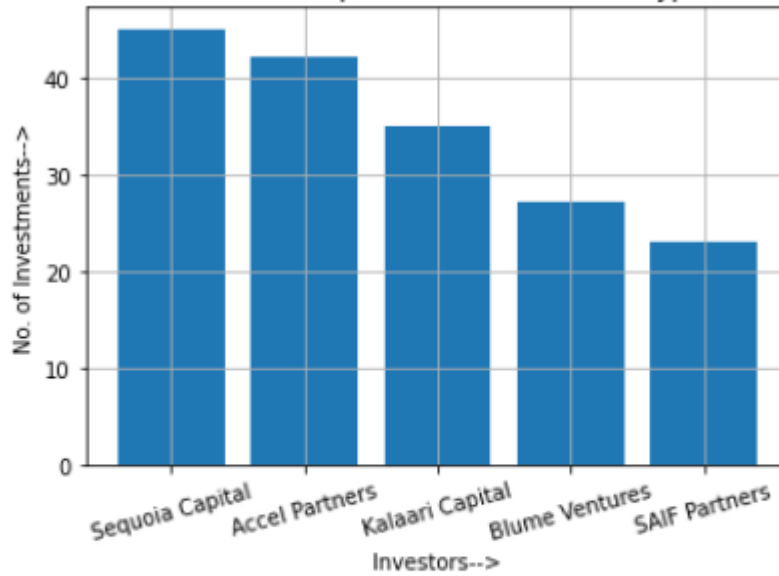

### Conclusion:

I would suggest my friend to contact these top 5 investors who have invested in distinct start-ups with investment type as Crowd Funding or Seed Funding in the order of the bar graph.

5)

Output:

Top 5 Investors in Distinct companies with Investment Type as Private Equity

Sequoia Capital 45  
Accel Partners 42  
Kalaari Capital 35  
Blume Ventures 27  
SAIF Partners 23

### Conclusion:

To expand his start-up I would suggest him to contact these top-5 investors who have invested in unique start-ups with investment type as private equity in the order of the bar graph.
